PROFESSIONAL SUMMARY

Final-year Bachelor of Science in Computer Science student seeking a technology internship or graduate opportunity with practical experience in software development, artificial intelligence, machine learning, cybersecurity, and data analysis gained through academic projects. Proven ability to develop AI-powered applications, build machine learning models achieving approximately 90% anomaly detection accuracy, and create web and mobile solutions. Skilled in Python, Java, SQL, HTML, CSS, JavaScript, Flutter, and Git, with strong analytical, problem-solving, and collaboration skills. Eager to apply technical expertise, contribute to innovative projects, and continuously learn in a dynamic technology environment.

EDUCATION

Bachelor of Science in Computer Science

Zetech University

Expected Graduation: 18th December 2026

Relevant Coursework: Cybersecurity, Artificial Intelligence, Software Engineering, Machine Learning, Data Analysis & Design, Computer Networks, Information Systems, Data Structures & Algorithms

TRAINING & CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 AI Foundations Associate — Oracle (Completed September 2025)
- Certified in Cybersecurity (CC) (In Progress) — ISC2
- Ethical Hacking — Cisco Networking Academy (Completed April 2026)
- Threat Management — Cisco Networking Academy (Women in Cyber Program – USIU Partnership) (Completed February 2026)
- Introduction to Cybersecurity — Cisco Networking Academy (Completed January 2026)
- Networking Basics — ICDFIA Academy through Cisco Networking Academy (Completed April 2026)
- Software Development — Power Learn Project (PLP) (Completed December 2024)

TECHNICAL PROJECTS

AI-Integrated Smart Packet Analyzer (Final-Year Project)

- Developed an AI-powered network monitoring system that captures, analyzes, and classifies network traffic to detect anomalous activities and potential cyber threats.
- Built and optimized machine learning models for intrusion detection using network traffic datasets, achieving approximately 90% detection accuracy through feature engineering and model tuning.
- Performed data preprocessing, feature selection, and model evaluation using accuracy, precision, recall, F1-score, and confusion matrices.
- Integrated NFStream for real-time network flow extraction and connected the trained ML model to a prototype threat detection application.
- Designed an interactive Streamlit dashboard for real-time visualization of traffic patterns, model predictions, and security alerts.
- Applied cybersecurity concepts including Intrusion Detection Systems (IDS), Zero Trust Architecture, and network traffic analysis to improve threat identification.
- Managed project development, documentation, and source control using Git and GitHub.

CampusConnect – Android Mobile Application

- Developed an Android mobile application that centralizes campus communication by enabling students to discover events, receive announcements, and access important campus information.
- Designed and implemented an intuitive user interface using Kotlin in Android Studio, focusing on usability and responsiveness.
- Integrated Firebase Realtime Database to store and synchronize event and announcement data in real time.
- Implemented Firebase Cloud Messaging (FCM) to deliver push notifications for new events, announcements, and updates.
- Applied software engineering principles, including version control with Git and GitHub, collaborative development, and testing throughout the project lifecycle.

NovaMediX – Telemedicine Platform

- Developed a telemedicine platform comprising a responsive website using HTML5 and CSS3 and a mobile application using Flutter (Dart).
- Designed user interfaces for authentication, appointment booking, emergency booking, accident reporting, and health monitoring features.
- Implemented form validation, screen navigation, and user interaction workflows to improve usability.
- Collaborated with team members throughout the software development lifecycle, including design, development, testing, and debugging.
- Strengthened skills in frontend development, mobile application development, problem-solving, and collaborative software engineering.

TECHNICAL SKILLS

Frontend Development

HTML5

CSS3

JavaScript
Flutter
Responsive Web Design

Programming

Python
Dart
C++

Database Management & Tools

Oracle SQL
MySQL
Oracle APEX
GitHub
Firebase Realtime database

AI & Data

AI Model Evaluation
LLM Response Evaluation
Prompt Engineering
Data Annotation
Technical Writing

WORK EXPERIENCE

Assistant Teacher
St Teresa Preparatory School, Ngemwa, Kiambu
January 2023 – August 2023

- Supported the learning of approximately 50 pupils across two primary school classes by delivering lessons, preparing instructional materials, and maintaining classroom continuity.
- Planned and delivered classroom instruction while covering for multiple teachers, ensuring uninterrupted learning during staff absences.
- Prepared and organized daily homework, assignments, lesson materials, and educational charts to enhance student engagement and understanding.
- Provided one-on-one and small-group tutoring to learners requiring additional academic support, helping improve their understanding and classroom participation.
- Supervised and led co-curricular activities, including swimming, games, and educational trips, ensuring student safety, participation, and teamwork.
- Collaborated with teachers and school staff to manage classroom activities, meet academic deadlines, and maintain an organized learning environment.

LEADERSHIP & COMMUNITY INVOLVEMENT

- Cyber Shujaa Alumni Member and Active Community Participant.

- Participant in the Cisco–USIU Cyber Shujaa Women Empowerment Program.
- Active Member of Zetech Tech Divas and STEM Girls.
- Participant in the Oracle Women Empowerment Program focusing on AI, Cloud Computing, Leadership, and Personal Branding.

SOFT SKILLS

- Attention to Detail
- Analytical Thinking
- Critical Thinking
- Written and Verbal Communication
- Research Skills
- Problem Solving
- Team Collaboration
- Adaptability
- Time Management
- Accountability
- Continuous Learning
- Quality Assurance Mindset
- Ability to Follow Detailed Guidelines
- Decision Making
- Organization

LANGUAGES

- English — Fluent
- Swahili — Fluent
